

PROFESSIONAL DEVELOPMENT WORKSHOP

WILL ARTIFICIAL INTELLIGENCE KILL THE RESEARCH PAPER?

"Writing is thinking made visible..."

Now that online chatbots can (almost instantly) write original essays and research papers (on almost any topic), how can teachers keep using writing in the classroom to help students learn to think, understand, and explain? Teachers at this workshop will share strategies for how to continue using writing as a tool for learning. We'll explore the cognitive tools of writing, basic strategies for teaching writing, ways to develop systems thinking through writing, practical "in-class" writing lessons, and creative ways to use technology to help students improve their reading and writing skills.

May 19, 2023 from 1:00-3:00 PM - For Grades 5-12
PRMS Room 106 (RSVP: tomkertes@sd52.bc.ca)
